Mongolian Armed Forces**

# MILITARY

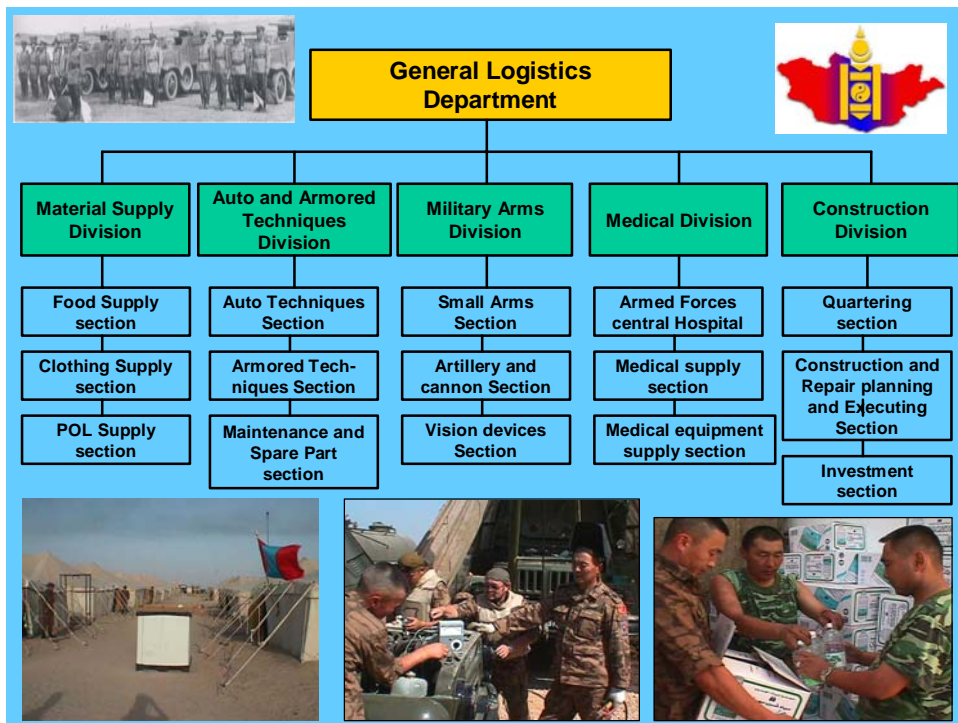

Established in 1920 by Damdiny Sukhbaatar

Mongolian national army was established in 1920 by Damdiny Sukhbaatar, who was leader of the national revolution. Since the liberation of Mongolia from external military forces in 1921, the Mongolian Army has been proudly serving its country. We participated the Halhin gol War in the east side of the country in 1939 and other major conflicts during the World War II in Far East.

Mongolian Armed forces consists of General purpose troop, Air and air defense troop, and Civil defense troop. According to the today's law the Border troop is under the Ministry of Law and Internal Affair during the peace time. In the screen you can see its main techniques, weapon systems, and equipments. Please note that Mongolia does not have Navy and Marines. Air and air defense troop is sub unit of the Land force.

Army logistics branch was established in 1921 when Mongolians founded the army. General Logistics Department is one of the four main departments in the General Staff of the Mongolian Armed Forces. It has 5 division, those are consist of several other sub units. GLD is also responsible of logistics support for Air and air defense troop (special rations and clothing, propellant, spare parts for the planes and helos, etc.)

## Supply method

### Centralized

### Decentralized

There are two main methods to support and distribute supplies to the units. Centralized and decentralized. Decentralized-transferring required and authorized funds to the units in countryside and they acquire their food, POL, and spare parts through the local contractors. But GLD have to acquire some certain types of materials and distribute them to the units such as bulk fuel, clothing, construction materials, ammos. It manages these supplies through its supply bases. There are 3 main supply bases and the Army maintenance factory, Army Central Hospital, army livestock farm, and Army Transportation battalion work under the control of the GLD.

## **Army Material Provision Central Base**

**Mission: Provide food, spare part, construction material, coal and firewood to units in capital city and provide clothing and major items to all units in and near Ulaanbaatar.**

## **Army POL Provision Central Base**

**Mission: Provide gasoline, diesel fuel, and all types of oil and lubricants to all units in and near Ulaanbaatar also provide gasoline checks to country units.**

## **Army Arms Central Base**

**Mission: Provide all types of ammos, small arms, artillery weapons, mortars, and vision devices to all Mongolian units. It also responsible for registering and keep number**

Next two slides you can see main missions of the supply bases and other sub units under the GLD.

## **Army Central Hospital**

**Mission:** Provide all levels of medical care to Mongolian armed forces and an emergency service to the eastern district of the Ulaanbaatar during peace time. It also preserve multi type field service hospital for the mobilization of the Army.

## **Army Maintenance Factory**

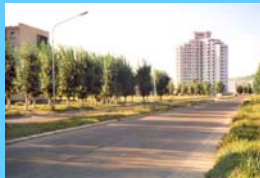

**Mission:** Provide all levels of maintenance for the all weapon systems such as small arms, cannons, mortars, and anti aircraft as well as assets auto and armored techniques.

## **Army Transportation Battalion**

**Mission:** Provide transportation of load, fuel, ammo, and other items to the all units in the country and provide car service for general Logistics Department.

## Other missions

- Support the construction and development of the country
- Animal husbandry
- Agriculture
- Disaster relief (flood, severe winter disaster, forest fire)
- Work in epidemic center and provide security

Besides its military missions, Mongolian Army execute wide varieties of civilian and humanitarian works and during these operation GLD fulfill some joint operation. In example, Mongolian Armed forces supported the Government's project "Millennium Road" and assist to build paved and secondary roads to the western part of the country.

MAF raise livestock to support its food supply. Because meat is the main food in my country. Besides that we plant all kinds of vegetables and wheat.

During the disaster Armed forces takes main responsibility to provide necessary assistance to the victims and support government. Also it is usually provide security in the center of epidemic disease and provide some required equipments such as sanitation, cleansing, and disinfection.

**Thank you for your  
attention.**
